Description

The Sim-Sport Control cable is designed as a simple solution for sim racers who desire to add buttons and or custom controls to their simulators.

Our design accepts up to 4 axis inputs such as potentiometers and up to 5 buttons or momentary switches. The Sim-Sport control cable uses a completely solder-free connection block, just slide the wire in and close the screw to secure. In addition this terminal block can be disassembled for easier packaging into your project.

These controllers are USB plug & play and are compatible with windows.
